

## VSEA - IMPLANTER PARTS Model VIISa® 810

- ◆ One piece design is easier to clean
- ◆ Diamond ground for precision alignment
- ◆ Formed threads are very strong
- ◆ In Production since 2003

### Signet Block Insulator

### Three views of Signet Part Number 30-1700

Signet's improved design for the 30-1700 block insulator features threads formed right into the alumina. The result is a block insulator that is easier to clean. This improved design can be used to replace all the OEM part numbers listed below. Signet customers have been using this improved design since it was first developed in 2003 to replace the original OEM E17201700 multi piece design.

Signet PN	OEM PN	Description
30-1700	E17201700 Ref.	Block insulator
30-1700	E17181601 Ref.	Block insulator
30-1700	E17181600 Ref.	Block insulator
