Signet Source Housing Electrode Alignment Tool

This unique Signet tool makes it much easier to install the extraction assembly in the source housing on the CF/DF3000, 350D/DE and 300XP Varian Medium Current Implanters. If the extraction assembly is not installed in the center of the source housing the motor adjust may not have enough travel for optimum beam adjustment. This tool makes the correct alignment quick and easy.

Signet Part #	OEM Part #	Description
30-5395T	N/A	Electrode Alignment Tool
