Oxford Instruments (VG)

V150 FEL Bellows short and long

Short - Signet Part Number 59-0230

Long - Signet Part Number 59-0240

The Signet enhanced V150 FEL bellows have been designed for reliability and longer life. A long and short bellows option is offered depending upon where the bellows are to be located on the tool.

The existing OEM design is complex and cumbersome. Signet has simplified the complex OEM V150 FEL bellows and replaced it with a more rugged bellows. For added strength and reliability, Signet uses a robotically controlled "edge welding" technique to ensure a strong, reliable interface between the bellows convolutions and the terminal flanges.

Signet Products Inc. supplies parts that replace OEM consumable parts. Whenever possible, they are engineered to improve performance and or extend service life. A "Ref." following an OEM part number indicates our part is an improved design related to this OEM part.

Ref. = Design Alteration of OEM Part
